

**MEASURING THE EFFECTIVENESS AND
PERFORMANCE OF E-GOVERNMENT PORTALS IN
THE KINGDOM OF SAUDI ARABIA**

BY

HAIFA FAHAD M AAL-ZUABI

**A dissertation submitted in fulfilment of the requirement for
the degree of Doctor of Philosophy in Information and
Communication Technology**

**Kulliyyah of Information and Communication Technology
International Islamic University Malaysia**

MAY 2014

ABSTRACT

The purposes of this study are to investigate the effectiveness of e-government implementation in Saudi Arabia, explore the underlying factors for the efficient performance of e-government portals, address the gaps and problems that have emerged in e-government portals, examine the impact of the problems found in e-government plan and the needs of its citizens, give the recommendation on the improvement of the performance of e-government portals in order to serve Saudi citizens and its users in the most effective manner. To achieve these purposes, the study used variety of theoretical frameworks namely; model desirability and acceptance of the technology by the citizens, effectiveness, indicative assessment, performance analysis, the obvious benefits and the desirability of its users. The samples of this study are of two types, the first sample cohorts were the experts in information technology and the second samples were the Saudi citizens, who are the portal users. Three instruments were employed in this study namely; the first one was e-government questionnaire adopted from the United Nations administered to the group of experts, the second questionnaire was a developed one administered another group of experts and the third instrument was administered to 300 portal users to measure the portal's success factors. The findings of the study showed the comparison among the three portals that the Ministry of Interior portal is the most effective one compared to other portals followed by the Safeer's portal and the Ministry of Labor portal. The experts' perceptions on the ease of use of the Ministry of Interior portal are not different from the perceptions of users. Almost all the experts and users agreed that the features of the Ministry of Interior portal are well designed in terms of its interface and graphics. In addition to that, the results of this study showed that the portal of the Ministry of Interior is effectively designed and has achieved a high level of system efficiency and performance. However, the study pointed to a decline in the performance of the portal of the Ministry of Labor for ease of use by users and that the site design does not win the overall satisfaction as well. Majority of the experts and citizens are satisfied with the ease of use of the Safeer's portal followed by the portal of the Ministry of Labor and with the quality of the portal of the Ministry of Interior. Based on this, the study suggests to the government of Saudi Arabia to improve the ease of use of the portal of Safeer for all students and provide the highest level of protection and security to enhance the quality of its performance to be users' friendly and save their time also for the other portals. The study also recommends the improvement on the high level of performance of portal of the Ministry of Interior even if it is the best in comparison with the other portals.

ملخص البحث

هدفت هذه الدراسة إلى الكشف عن مدى فعالية تطبيق البوابات الحكومية في المملكة العربية السعودية، معرفة العوامل الأساسية لأداء ناجح لتلك البوابات، وللتعرف على المشاكل التي ظهرت فيها وأثر هذه المشاكل على مشروع تطبيق الحكومة الالكترونية في السعودية وإعطاء التوصيات المستخرجة من الدراسة لتطوير أداء هذه البوابات وذلك لخدمة المواطنين السعوديين بأكثر الطرق فعالية. ولتحقيق هذه الأهداف، تم استخدام العديد من الإطارات النظرية مثل: نموذج استحقاق وقبول للتكنولوجيا من قبل المواطنين، الفعالية، التقييم الإرشادي، تحليل الأداء، الفوائد الجلية واستحقاق المستخدم لها بشكل عام. وعلى هذا، تم اختيار العينتين الأولى منهنما هي مجموعة من الخبراء في تقنية المعلومات والثانية هم مستخدموا البوابات من المواطنين. وقد استخدمت الباحثة ثلاث أدوات، الأولى هي استبيان لمراحل الحكومة الالكترونية التابع للأمم المتحدة الموزع على مجموعة من الخبراء، أما الاستبيان الثاني تم تطبيقه لمعرفة أهم عوامل نجاح البوابات الالكترونية على مجموعة أخرى من الخبراء وأما الاستبيان الثالث فقد تم تطبيقه على ٣٠٠ مستخدم للبوابات. أشارت نتائج هذه الدراسة أن بوابة الحكومة الداخلية قد تطورت بشكل فعال مقارنةً بالبوابات الأخرى. ومع ذلك، فقد تم اعتبار بوابة السفير على أنها الأكثر تطوراً مقارنةً مع بوابة وزارة العمل. إن تصورات الخبراء لسهولة استخدام بوابة وزارة الداخلية ليست مختلفة بشكل كامل عن تصورات المستخدمين. ووافق كل من الخبراء والمستخدمين على أن بوابة وزارة الداخلية تمتاز بتصميم جيد للواجهة و الرسومات المستخدمة. كما أظهرت نتائج هذه الدراسة أن تصميم هذه البوابة هو تصميم فعال، بالإضافة إلى تحقيق مستوى عالٍ لفعالية النظام و الأداء. وأيضاً أشارت الدراسة إلى تدني أداء بوابة وزارة العمل بالنسبة إلى سهولة استخدامها من قبل المستخدمين، وعدم نيل تصميم الموقع الرضا الكلي أيضاً. كما أثنى الخبراء على مستوى الأمان و الموثوقية المتواجدة في البوابة الحكومية، و قبولهم لأداء هذه البوابة. كما أظهرت نتائج تحليل الأداء لبوابة السفير، أن هناك نسبة كبيرة من المواطنين والخبراء قد أثنوا على سهولة استخدام الموقع وأنه لا يوجد فرق كبير بالردود من قبل الخبراء والمستخدمين حول نقاط الضعف والقوة للبوابة. من خلال النتائج يوجد الكثير من الهفوات للحكومة الالكترونية فيما يتعلق بالتصميم والأداء وسهولة الاستخدام. ومثالاً على ذلك، تدني مستوى فعالية استخدام بوابة وزارة العمل مقارنةً مع وزارة الداخلية بينما بوابة سفير تم الإجماع من قبل العينة على أنها الأفضل استخداماً من بين البوابات الحكومية المذكورة في هذه الدراسة على الرغم من ضآلة مستوى الحماية في بوابة سفير وبوابة وزارة العمل بينما تميزت بوابة وزارة الداخلية بالجودة العالية والتنسيق. وأخيراً، أوصت هذه الدراسة حكومة المملكة العربية السعودية على العمل على تطوير سهولة استخدام بوابة السفير و ذلك بتوافر استخدامها لجميع الطلاب . بالإضافة إلى، توفير أعلى مستوى من الحماية والأمان لتعزيز جودة الأداء وتوفير الوقت، و تطوير تصميم الرسومات في الموقع لسهولة الاستخدام من قبل المستخدمين. على الرغم من أن بوابة وزارة الداخلية قد بلغت مستوى عالي من الأداء مقارنةً بالبوابات الأخرى.

I dedicate this work:

To my dear merciful mother who always prays for me for guidance from the bottom of her heart, may Allaah protect her from all distresses

To my dear father who is a school in his patience and endurance, may Allaah protect him

To my husband Abdullmajeed for his endurance of my busyness.

To a slice of my liver, my son Abdullah and my daughter Sara for their patience for my busyness.

To all my brothers and sisters, may Allaah protect them.

To my distinguished lecturers whom I learnt a lot from them.

ACKNOWLEDGEMENTS

Praise be to Allaah the Lord of the worlds, and may the peace and blessings of Allah be upon the noblest Prophet Muhammad (sallallahu ‘alaie wasallam), his household and all his companions.

I thank Allaah Who helps me to accomplish this thesis, then, my profound thank goes to my supervisor Dr ‘Imad Fakhri AL-Shaikhili for his pieces of advice, counsel, his time and effort spent in the way of completing this work, I beseech Allaah to reward him tremendously.

I thank Dr. Professor Abdul Qadir Al-Fantukh, Deputy Minister at the Ministry of Higher Education for Planning and Information in Saudi Arabia for his pieces of advice and invaluable suggestions given to me for this thesis, may Allaah put that efforts in the scales of his good works.

My heartfelt thank goes to Dr. Feras Muhammed Al-Madani, Deputy Dean for the Scientific Research at the Northern Border University in Saudi Arabia for his assistance and his meticulous facilitation of all difficulties which assist me in finalizing this thesis, I beseech Allaah to reward him immensely.

Sincere thanks to the Dr. Jobair Mohammed Aljobair Secretary-General of the Association of Human Rights in Saudi Arabia for his support and encouragement may Allaah put that efforts in the scales of his good works.

My thanks goes to Saudi Cultural Attaché in Lebanon Mr-Mosaed Aljarah for his assistance may Allah put that efforts in the scales of his good works.

I thank Dr. Engineer Ali Mohammed Alkhouri, Director of the general of the Emirates Identity Authority in the United Arab Emirates for his advice and suggestions given to me may Allah put that efforts in the scales of his good works.

I shall never forget to thank Dr. Professor Asadullah Shah for his assistance and his pieces of advice I beseech Allaah to reward him immensely.

Also thanks to Professor Abdul Wahab Abdull Rahman and in specific all the teaching staff at the Kulliyah of Information and communication Technology ‘KICT, International Islamic University Malaysia, who had contributed greatly to the pilot test of the research instrument of this thesis.

My thank goes to the Ministry of Higher Education, particularly, Saudi Arabia Cultural Attaché in Malaysia and the Ministry of Internal Affairs spearheaded by Prince Dr. Bandar bin Abdullah Al-Mashari Al-Saud and Ministry of Labor for helping me during the implementation of this thesis.

Lastly, I thank all who had contributed to the completion of this thesis and all the participants.

May Allaah guide and guard all to what He loves and likes, He is the All-Hearer, All-Listener.

The Researcher
Haifa Fahad Al-Zuabi

3.12	The MOI portal interface	65
3.13	The Ministry of Labor	67
3.14	Information Management System of Enterprise	69
3.15	Safeer portal	70
4.1	three steps of first phase of research design	73
4.2	factors of experts evaluation	76

4.3	The design of the second phase	77
4.4	The research Framework.	80
4.5	The flow chart of Questionnaire design	84
5.1	A histogram of frequency for the three portals.	93
5.2	Absolute key informants' responses frequency	99
5.3	Absolute key informants' responses frequency	101
5.4	Absolute key respondents' responses frequency.	104
5.5	Absolute key respondents' responses frequency.	106
5.6	Absolute key respondents' responses frequency	108
5.7	Absolute key respondents' responses frequency	110
5.8	Absolute key respondents' responses frequency	114
5.9	Absolute key respondents' responses frequency	117
5.10	Absolute key respondents' responses frequency	120
5.11	Absolute key respondents' responses frequency	123
5.12	absolute key respondents' responses frequency	125
5.13	absolute key respondents' responses frequency.	128
5.14	Absolute key respondents' responses frequency	129
5.15	absolute key respondents' responses frequency	131
5.16	absolute key respondents' responses frequency	135
5.17	absolute key respondents' responses frequency	138
5.18	absolute key respondents' responses frequency	141
5.19	absolute key respondents' responses frequency.	144
5.20	absolute key respondents' responses frequency	146
5.21	absolute key respondents' responses frequency	148
5.22	Absolute key respondents' responses frequency	150
5.23	absolute key respondents' responses frequency	152
5.24	absolute key respondents' responses frequency.	156

5.25	absolute key respondents' responses frequency	159
5.26	Efficiency graph of Ministry of labor portal	223
5.27	values of best-performers (%)	225
5.28	Efficiency histogram	226
5.29	efficiency graph of the Ministry of interior	227
5.30	values of best-performers (%)	228
5.31	Efficiency histogram	230
5.32	efficiency graph of the Ministry of safeer	231
5.33	values of best-performers (%)	232
5.34	Efficiency histogram	234
5.35	A histogram of gender frequencies of key informants; male and female	235
5.36	A histogram of income frequency distribution of key informants; Less than 5000 SR, From 5000 - 10000 SR, 10001 - 15000 SR, and more than 15000 SR.	236
5.37	A histogram of key informants; material status, single, married, and others	237
5.38	A histogram of education levels of key informants	238
5.39	A histogram of key informants; average hours of computer use in a week	239
5.40	A histogram of key informants; age distribution in 5 categorical intervals	240
5.41	A histogram of gender frequencies of key informants; male and female	241
5.42	A histogram of income frequency distribution of key informants; Less than 5000 SR, From 5000 - 10000 SR, 10001 - 15000 SR, and more than 15000 SR.	242
5.43	A histogram of key informants; material status, single, married, and others	243
5.44	A histogram of education levels of key informants	244
5.45	A histogram of key informants; average hours of computer use in a week	245

5.46	A histogram of key informants; age distribution in 5 categorical intervals	246
5.47	A histogram of gender frequencies of key informants; male and female	247
5.48	A histogram of income frequency distribution of key informants; Less than 5000 SR, From 5000 - 10000 SR, 10001 - 15000 SR, and more than 15000 SR.	248
5.49	A histogram of key informants; marital status, single, married, and others	249
5.50	A histogram of education levels of key informants	250
5.51	A histogram of key informants; average hours of computer use in a week	251
5.52	A histogram of key informants; age distribution in 5 categorical intervals	252
